

Excercises to the lecture „Modern Methods in Drug Discovery“ WS21/22

1st Assignment

1. Read the enclosed instruction of a prescription medicine of your choice. Write down the actual effective substance. Try to find its chemical structure and some information about its molecular target

e.g. using PubChem <http://www.ncbi.nlm.nih.gov> or Wikipedia

2. Give some reasons why the medicine has a completely different name compared to the actual substance.
